## What's New In?

===== Dnote lets you create notes within individual books. Notes are basic attachments to books that contain content inside and are saved locally using the Note Store. For a deeper understanding on how to use Dnote check out Dnote Cloud. Notes: ===== Dnotes are the basic notes that users can create, edit and remove from books. You can view notes while you are using the Dnote app, however, to make things easier, Dnote Cloud allows you to synchronize notes and views with remote servers. Notes can be attached to a book and therefore it becomes an entry in the Note Store of the user who created the book. The Note Store is persistent. It will keep notes that have been removed until the user removes them or the Note Store is cleared. Once the Note Store is cleared, the notes will be permanently removed from the Dnote app. When switching between notes in the Note Store, use the button above the note or below the note to swap between current and previous notes or move to the next note in the list. Notes can be copied or moved to other books. To view the book where a note is attached, use the "Edit Note [Name]" command and click on the bookmark button in the top right hand corner of the screen to open the book. You can find the list of books in the User app by selecting "My Notes" and selecting "Books". You can list notes in books from the list of the book. For more detailed information on Dnotes and Dnote Cloud visit the wiki: Resources: ===== Dnote

---

Cloud Wiki: Repository: Usage Examples: ===== - Create a note: Dnote --book [note-name] Examples: - Create a note named "FirstNote": Dnote --book firstnote - Create a note named "SecondNote" that moves to "FirstNote": Dnote --book firstnote --move firstnote - Create a note with a link: Dnote --book firstnote \\* Link To FirstNote Links: ===== Icons: - The \* icon (underlined) is used to create links. - \[name\]

---

## System Requirements:

4GB RAM 4GB OS X Lion NVIDIA GeForce GTX 680 or AMD HD 7970 (4GB) or better 2 GB VRAM  
8GB Steam Cloud space 20GB of free space on hard drive AMD Catalyst 13.12 or newer and nVidia PhysX  
2.13 or newer If you use ATI graphics cards or you've not got nVidia PhysX, we recommend installing PhysX  
add-on to make your game more fun and immersive. If you do
