Release history AutoCAD was originally known as AutoCAD LT, which was released in 1993. AutoCAD LT was initially sold as a separate product, but by 1997, AutoCAD LT was included as part of AutoCAD. On October 31, 2019, Autodesk announced that AutoCAD 2020 will be the last major AutoCAD release. On January 14, 2020, the final AutoCAD 2019 Release (2019r1) was released. On February 4, 2020, Autodesk announced that the AutoCAD LT 2019r1 release was the final release of AutoCAD LT. It will be completely retired on April 2, 2020. Release numbers The first public release was AutoCAD Release 16, with AutoCAD Release 15 as an upgrade to Version 13. Release 16 was sold as AutoCAD LT (now known as AutoCAD), and Release 15 was sold as AutoCAD Release 14 (also known as AutoCAD LT Release 14). On March 11, 1996, AutoCAD Release 16i was released for the Macintosh platform (as well as AutoCAD LT Release 15i for Windows). AutoCAD Release 16i is still offered for Macintosh, and AutoCAD LT Release 15i is still available for Windows as part of the AutoCAD Application Suite. On January 30, 1998, AutoCAD Release 17 was released (AutoCAD LT Release 16i was rebranded as AutoCAD LT Release 15i). On March 11, 1999, AutoCAD Release 18 was released. AutoCAD Release 18i was released on March 12, 2000, as part of the first update to AutoCAD Release 18. In 2001, AutoCAD Release 19 was released. AutoCAD Release 19i was released on August 28, 2001, and included a number of major new features, such as support for the Microsoft Windows XP operating system, along with the ability to export.dwg files. In 2005, AutoCAD Release 20 was released, with AutoCAD Release 20i released on September 28, 2005. The release included many updates, such as extended object-oriented programming capabilities (for.NET applications, including Autodesk Exchange apps), improved C++ object library, support for AutoCAD Civil 3D, and expanded external data interfaces. In 2006, AutoCAD Release 21 was released on February a1d647c40b

Support for additional features that were introduced in AutoCAD LT 2023: Alternate Reference Charts: Now you can bring your own reference charts into AutoCAD. (video: 1:30 min.) CAD-to-CAD (2D) Data Linking: CAD-to-CAD (2D) data linking can be used to link two copies of a drawing or data set together. (video: 1:30 min.) Additional Options for Drawings: Add additional options for work instructions to your drawings. (video: 1:03 min.) Add new features to dashboards: Accelerate your design process with new dashboards and reporting features. (video: 1:21 min.) For more information, see the What's New in AutoCAD page. In this article, we look at the new markup import and markup assist features, plus changes to the CAD-to-CAD data linking options, and the new dashboards and reporting options. Import and markup assistance Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. The new markup import and markup assist features are used to help you quickly incorporate feedback into your drawings. Rapid feedback using markup Markup describes marks and annotative text that can be placed into drawings. You can quickly and easily import markup from paper or paper files, or create markup within AutoCAD. When you import markup, it can be associated with parts or dimensions, and you can access it when you view the drawing or when you enter notes. If you create your own markup, you can also access it using its reference name (SRC_xxx or IMP_xxx). Markup assist Markup assist is a tool for assisting in markup creation. It makes it easy to: Apply formatting when you create markup. Preview a design and see how it will look when it is completed. Search for a specific text string in your drawings to associate the text with the drawing. Edit existing markup. Select a specific text string to make changes or replace it with a new text string. Find the current drawing path and enter a new location in the drawing. Generate a hyperlink from the text. Create annotations, including notes.
