In other words, if you’re viewing the design on a monitor that’s 100 pixels wide, the canvas will be 100 pixels wide. On the other hand, if you’re viewing the design on a monitor that’s 200 pixels wide, the canvas will be 100 pixels wide, so it’s 50% larger. The status bar, which displays information about the workspace, including the size, number of points, and type of the active layer. The workspace also contains the tools that enable you to create objects. These tools are: Rectangle: Allows you to draw an object or manipulate existing objects with the goal of creating perfect rectangles Spline: Allows you to draw an object or manipulate existing objects with the goal of creating curves Arc: Allows you to draw an object or manipulate existing objects with the goal of creating circles The
