Babuki For Windows

Babuki is a fun, trendy, and

user-friendly application which is designed to help you keep in touch with your Facebook friends on a regular basis. The application features a unique approach in which you can see both the online and offline states of your Facebook contacts simultaneously. So when you log on to Facebook, you can see your friends that are currently online, and those that are not. From

our application, you can easily create groups, see your friends' birthdays, join in with their games, comment on photos and albums, chat with your friends, and more. Key features:

- Multiple Facebook accounts and group features
- Intelligent dialing (no number needed)
- Stealth settings and recognition of your friends' faces
- See which of your Facebook friends are online

by using the stealth features

- Hide your online status from friends
- Chat with your friends online and offline
- Show and play a Flash game
- Add more of your Facebook friends to Babuki
- Widgets, newsfeeds, etc.

About us:

Babuki is a Flash application that makes it possible to connect with your friends, keeping you updated with what is going on in their lives. Our

application is a free download and provides easy and intuitive navigation. You can also use it as an offline application, so you will never be without your friends or your life. What's New In?

Babuki will let you stay in touch with all of your Facebook friends no matter where you are. Babuki will let you stay in touch with all of your Facebook friends no matter where you are. No sync, no dummy mail, no data mining and no more password! Make sure not to waste time with FB

apps to find all your contacts or switching between them. Simply connect to FB once, and start meeting people by searching for them. All contact details of your contacts from your addressbook are transferred to your new FB profile. Have them with you wherever you go. Use your favorite phone number for IM and make FB to call you. You can search for friends

even if they are not online. Add contacts to your list by importing a local csv file. You can even import contacts from a dynamic csv file: the imported contacts are stored in a database and available offline. Babuki takes care of everything for you. You don't need to sync anymore you just need to add your Facebook account to Babuki. Features: ☐ Import new contact from local csv

file □ Import new contact from dynamic csv file. □ Import contact from CSV file on a website □ Add contacts to your list by importing a local csv file □ Add contacts to your list by importing a dynamic csv file □ Import contacts from a dynamic csv file containing a list of internet addresses. □ Import contacts from a dynamic csv file containing a list of internet addresses. □

Import contacts from a dynamic csv file containing a list of internet addresses.

□ Import contacts from a dynamic csv file containing a list of internet addresses.

□ Import contacts from a dynamic csv file containing a list of internet addresses.

□ Import contacts from a dynamic csv file containing a list of internet addresses.

□ Import contacts from a dynamic csv file containing a list of internet addresses.
