It is likely the opinion of most casual observers that every memorable flamenco dancer is either a gypsy or a representative of a particular region. There are clearly a few dancers who rose to fame and came to represent the dance in the first place. In Spain, however, flamenco was a relatively recently incorporated genre that has been very successful in adapting to its environment over the past several decades. This presentation will focus primarily on the history of flamenco, the economic and social circumstances in which it originated, and the origins of modern flamenco that resulted from the adaptation of the style to the new circumstances.
