php version checker is a small script that  
will check if you have access to the php.ini  
file and if you dont you will be shown a  
message about this. it is not a good idea to  
download a version of php for testing but  
as far as i know php is not compiled into  
windows so the system doesnt really need  
it. javascheduler is a little tool to add trello

that is characterized by the impairments in communication and social interactions. If treatments are not established for ASD soon, the subjects are likely to suffer from life-long difficulties in social skills. Several medications, such as antipsychotic and stimulant, have been shown to be effective for ameliorating various symptoms of ASD. However, there are some discrepancies between clinical and subclinical assessments of these medications for ASD. Furthermore, the functional correlates of the medication effects on ASD have not been sufficiently elucidated. In the present article, we review the research progress in neuroimaging-based assessment of drug
