By entering your email address you agree to receive periodic emails about MH, AC and similar.Q: jquery: method for creating this puzzle I'm trying to make a puzzle out of separate objects. These can be shaped as boxes, rectangles, circle, stars, etc. The pieces must be able to overlap and connect to the next piece in a chain-like manner to form a complete scene. Each piece can have a class that defines its shape (box, rectangle, star, etc) My question is, how could I create this puzzle using JQuery? EDIT: I've created this little puzzle using JQuery. The page loads a JSON object with pieces and put them on screen as a puzzle. The code is still a bit messy, but the finished page can be seen here: Can you help me improve this code or give me some ideas to take things further? A: I think this is a pure javascript solution, but there is also jquery's one, i.e. Puzzle.js > /\*\* \* \* Multi-dimensional JavaScript puzzle implemented as a \* JSON file and an object. (based on codepen). \* \* Changes proposed here: \*/ var V = parseInt(localStorage.getItem("V")) || 3 0cc13bf012
