HyPerMotion Tech uses advanced tracking technology to deliver accurate, immersive and most importantly, authentic simulations in gameplay. Players can now experience a more accurate depiction of individual movement through an interactive player model combined with enhanced breathing and explosive movement. There's more to play, and more to master, in Fifa 22 Cracked Version than ever before. Presentation The most important presentation piece of any football game is arguably the presentation and the way that everything in the game goes together as a package. FIFA 22 has an excellent offering with some clear improvements over FIFA 17 with the way the player models feel and the way a goalkeeper kicks the ball. I have a great relationship with EA's Likeness Team that allows us to stream a range of content over PlayStation platform, and in this case FIFA 22 is pre-loaded onto the PlayStation console. The presentation are essentially the same as last year's game with no big improvement over FIFA 17's presentation. However, it is a little easier to pick out details in the game. The goalkeeper models in this year's game look better, and the graphics overall are slightly clearer than last year. The presentation for the game is good, but not great. The menu system is confusing and there are various little issues with UI and controls that are annoying. The overall presentation still isn't as impressive as it could be, but that's a very slight complaint on a game which has a lot of positives. Gameplay FIFA games are about becoming a footballing god, the game you play with or against friends is your journey to become a world-class footballer. FIFA 22 does a great job of providing a much more immersive experience in the game, especially on the new and improved engine. Players have been immersed into the game in a more realistic experience that has been completely rebuilt from the ground up. There are some new things that have been added to the game, as I have already mentioned, HyperMotion technology allows the game to feel more authentic to real life football. Players can now make incredible blocks, tackles and moves that are nearly impossible in real life. They also have a more realistic range of movement compared to other games, allowing for less silly button mashing and a more realistic experience. FIFA 22 provides a better football experience for players and spectators alike, and that is a good thing. The individual team skills and tactics have been made more intuitive and there is a lot of flair in the game that

What's new in Fifa 22:

- **New camera angles allow enhanced ball control. You can now use reach and run controls like never before to beat an opponent with just a nice, subtle flick. Brilliant touches and punches also show even more of the artistry and precision of players.**
- **Sweeping challenges.**
- **Advanced goalkeeping. Save the day with Quick-Goal, or start with perfect long shots with Save Shot.**
- **FIFA 22 introduces a method of finding groups of players and preparing a formation to suit the group's playstyle. You can call for players from your own squad and those in the selection pool, or customise squads with other players in their group from any of FIFA's official packs.***
- **Help your teammates score or pass the ball with creative dribbling or feints on the ground. You can now pass by shielding the ball with your hands.**
- **Assistive technology - designed to make the game easier for players with disabilities. We've added a new movement menu to the Pass and Attacking Run controls to make it easier for gamers with disabilities to control these actions.**
- **There are also new goal celebrations for you to capture. Pre-recorded cut scenes can now also be used when a goal is scored. FIFA 22 is the first FIFA title to feature player celebrations.**
- **Score from the Throw-In - head the ball with an overhead kick, then quickly drive it into the opposition goal using various passes and technical skills. The Throw-In can be nominated in the penalty box.**
