
responders. The best pre-hospital life-saving skills of first responders are required regardless of the agency that originally responds. By providing the appropriate education, training and certification of first responders the mission of the emergency medical services (EMS) system is improved, the overall readiness of emergency responders and the public at large is enhanced, and the lives of the public are saved. By the use of a highly developed emergency medical skills training program, KNX911 has created a 2nd responder training program which provides for the rapid and efficient training of additional first responder personnel. The program is designed for agencies, and individuals, who desire to conduct private or commercial training for first responders. KNX911 provides all 2nd responder training in a commercially supported virtual classroom which facilitates cost-effective, accessible, quality training which is readily available 24 hrs a day. Additionally, we offer: Personalized training Multiple testing centers/locations Offline/On-site instruction for large/medium classes/groups In-depth instructor/staff training Certification and licensing of first responders Efficient, cost effective training - often within weeks of the original training program Fast, proven results in our live, virtual classroom KNX911 is proud to offer a program that is recognized nationally as a leader in emergency medical response training.

Q: Utilization of Intersystem Triggers

Consider the following block diagram. Is it possible to implement a trigger that fires when entry is made on any of the four red boxes as indicated by the arrows? I can think of only two possibilities: When the ALU reads the same memory address via the memory bus and a new value stored in the register, a trigger can be constructed that counts the number of reads and notifies the CPU. Compute the sum as a real time process at the ALU. However, I am not sure if either of these would be correct. Can anyone help me with this?

A: The requirements are a bit unclear, so I'll
