product keys are required for installation of autodesk products and are used to differentiate products that are both sold independently and as part of a product suite. for example, installing autocad 2017 as a point product requires product key 001e1, but installing autocad 2017 from the autodesk product design suite ultimate 2017 requires product key 781e1. the same version of autocad is in both software packages but the product key differentiates one package from the other.
