- **Adjust Between Documents:** In Adobe Photoshop it is now possible to temporarily copy text or shape or draw a selection to another document and instantly adjust these elements in a new document without having to jump out of the original document. This feature, which is available by selecting Edit > Copy or Edit > Copy Path or Shape and then clicking the desired destination tab, allows you to quickly adjust a selection or draw a shape in another document without having to copy and paste.
- **Smart Content Aware Fill:** Photoshop 2017 can automatically detect the edges of objects in your image, making it easy to remove unwanted objects such as cars, people, and other elements from an image. If the edge pixels are a single color, Photoshop can automatically fill in the edges of the object in a fill layer. If there are portions of the edge that are blue and other color, or if some of the pixels at the border of the object are not transparent, Photoshop can blend the edges to fill to a single color. This content-aware fill technology is available in both shape and draw layers.
