Adobe is entering a sphere of digital imaging that is becoming crowded with free, open-source alternatives, most of them easier to use. However, the vector-based tools such as Inkscape and InDesign are not specifically designed for the frequent tasks of image editing. They are instead general tools that are often thought to be good alternatives to Photoshop. In order to work with images, elements to accomplish specific tasks include separate programs for each of the following: image layers, photos, adjustment layers, alpha channels, transparency, selections, and 3D. Another new feature, Adobe's Sensei, allows Photoshop to be used to create training data for more powerful training applications. One example is Adobe Handwriting Recognition. I have performed several tests with a high resolution picture file, (2928×4032 px) 1 megapixel camera, full-sized mode (1.5mp), manual settings: iso 100 (fast), f/2.0, 1/100s and metering points placed away from the brightest object. I did not convert the images on the camera. I was able to see image noise just below the stars, and I challenge you to tell me how you would qualify an image with such high fine-grain noise levels as an 'extremely sharp' image. This answer makes me uncomfortable with the sharpness metric used frequently on the web. It doesn't represent the sharpness or quality of the image. It does represent a user's opinions about the sharpness of a photograph. Sharpness is not the only criteria. What would you classify as very blurry or very high contrast?

Today, it steps into the realm of social media, through Share for Review. Share for Review is a powerful tool that makes it simple to share your work and view other people's work in real time. Remember when you shared your work on Facebook, only to have it disappear several minutes after you hit the "Start Collaborating" button? Share for Review is the missing link between Photoshop and social media. This is a really amazing tool to make you understand origin of vanishing point of any scene. I think Vanishing Point is the most popular and THE BEST One kind of software Among all these things.
