```
//=====
===== /** * This is a Button base that draws
a button shape. ** This allows you to create your own button shapes, in any UI scale size without *
needing to inherit a parent class. You can use this class to style your own buttons and widgets. ** If
you need a button with rounded corners at any time, you will have to use something else, since
buttons don't support custom corners. */ UCLASS(collapsible, hidecategories=Object) class
UCLASS(Widgets) AButtonBase : public SBorderContainer { GENERATED_UCLASS_BODY()
UPROPERTY(EditAnywhere, BlueprintReadWrite, Category = "ButtonBase|Button") SButton Style;
public: //~ Begin UObject Interface. virtual void PostLoad() override; //~ End UObject Interface.
